From Summer to Fall.

The backbone of the summer was broken last Saturday afternoon with the advent of a heavy squall of wind and rain from the northeast, shifting later to the east. It had all the earmarks of the regular fall blow and the change in the atmosphere was at once perceptible.

And Sunday it rained. Although the early morning was fair, about ten o'clock it began to rain and kept almost steadily at it until after midnight, all reports agreeing that there was a rainfall of between five and six inches.

The wind squall and rain were evidently the result of atmospheric disturbances resulting from the storm brewing somewhere in the West India Islands which was later confirmed by telegraphic news and the display of storm signals at the Halifax River Yacht Club.
